-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 April 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 24, 2009 has been entered. Claims 1-7 and 10 were amended; and, claims 11-14 were added. Currently, claims 1-14 are pending.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in the prior Office action issued on August 8, 2008.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1 and 10 recite "... opposing surfaces of the casing film are directly opposing without intervention of said electronic device element *and are in contact with each other without being thermally*

Art Unit: 1795

sealed ...” (emphasis added). Upon review, it appears that there is no support for this limitation in the instant specification.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-14 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 2 and 3 recite “... a *direction* along a side of the electrical device element ...” (emphasis added). It is unclear how closely the recited direction follows the contours of the side of the electrical device element.

Claims 1 and 10 recite “... *substantially* held at zero degrees ...” (emphasis added). The use of the term “substantially” renders the claims indefinite because the quantity or extent of the terms “substantially” is used to modify cannot be ascertained.

Claim 14 recites “... the casing film comprises two opposing casing films ...”. The recitation is unclear because term “casing film” is described as both a single element and plural elements.

Response to Arguments

7. Applicant’s arguments with respect to claims 1-14 have been considered but applicant has amended the claims such that new grounds of rejection were necessitated

Conclusion

8. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Yageta et al. (US 2003/0049527) teaches a highly reliable and durable battery and a process fabrication thereof (Abstract; Figs. 14-16).
